CONTINUOUS IMPROVEMENT OF TEACHING AND LEARNING QUALITY WEBINARS

TITLE/ TYTUŁ: Online Language Teaching: Creating a dynamic learning environment

10/11 /2020

DESCRIPTION/ OPIS:

Online language teaching is a new environment for instructor-led language teaching. Teacher-centered approaches with present, practice, produce or even more communicative practices do not automatically translate into an online environment. Adapting to online teaching requires flexible and differentiated techniques that fit all learners.

In this presentation, the participants will learn more about practices for engagement and designing activities to build online community. Participants will leave with ideas on how to create active online lessons, how to create a differentiated environment, how to use effective methodology for online teaching, and how to capitalize on technology to enhance online learning.
