CONTINUOUS IMPROVEMENT OF TEACHING AND LEARNING QUALITY WEBINARS

TITLE/ TYTUŁ: Story-based CLIL for (Very) Young Learners

08/02/2021

Stories are considered a traditional treasure of each culture. A simple story can cater for all areas of children's early learning. Children immerse into the topic of the story in every activity they do, they do not need long introduction and motivation at the beginning of each lesson. In them they absorb and compare global perspective of different cultural backgrounds.

Stories offer a large platform of activities that help children to understand, use the phrases from and re-tell their contents. The activities represent a wide scale of games, cards, worksheets and ideas for language development, maths, science, music, art and movement. Children immerse into the story from different angles using effectively all the areas of learning, cultivating language skills, logical thinking, developing executive functions, practising fine motor skills and multisensory perception.
