CONTINUOUS IMPROVEMENT OF TEACHING AND LEARNING QUALITY WEBINARS

TITLE/ TYTUŁ: Improving Online Teaching Skills While Teaching

22/ 02 /2021

Teachers often have limited time and resources for professional development. Additionally, some professional development may not fit the needs of individual teacher's contexts.

Finding and creating communities of practice is not always intuitive and with the many demands of online teaching, teacher development through communities may not be a priority.

In this webinar, participants will review areas for continued professional development in online teaching.

Participants will discuss prioritizing the focus of professional development, goal setting, finding opportunities, creating opportunities within teacher networks, and cultivating motivation for professional development.

Participants will leave renewed and goal-centered, with a new community of practice.
